

Monomer

LMA

Product Introduction:

LMA , lauryl methacrylate, is a low-viscosity, low-polarity, long-chain monofunctional monomer with low glass transition temperature and low irritation.

Product Features:

- ◆ low viscosity
- ◆ Low volatility
- ◆ low shrinkage
- ◆ Good weather resistance
- ◆ Low glass transition temperature
- ◆ Flexibility
- ◆ Good water resistance

Application

- ◆ adhesives
- ◆ coating
- ◆ Textile finishing agents
- ◆ Structural materials

Technical information

Chemical Name	lauryl methacrylate
Appearance	Clear and transparent
Polymerization Inhibitor (MEHQ) (ppm)	100~300
Solvent Content (wt%)	≤0.1
Moisture Content (% , Karl Fischer)	≤0.1
Acid Value (mg KOH/g)	≤0.5
Color	≤50
Specific Gravity (25°C)	0.86~0.89
Viscosity (mPa·s, 60 RPM, 25°C)	4~8

Specification

Net weight 170 kg/drum

Storage

- ◆ Transportation and storage of non-hazardous chemicals
- ◆ Cool, dry and sealed storage

This information and all further technical suggestions are based on our existing knowledge and experience. However, such information and technical advice do not mean that we should bear any debts or other legal responsibilities, including those related to existing third-party intellectual property rights, especially patent rights. In particular, we have no intention to make or imply any legal guarantee or guarantee on product attributes. We reserve the right to make any changes based on technical progress or further development. Customers are still obliged to carefully inspect and test the products they buy. The performance of the products mentioned in this statement shall be determined by tests, which shall be conducted only by qualified experts and independently by customers. Quoting trade names used by other companies does not mean recommending any products, nor does it imply that similar products cannot be used.
